## Segezha Anthracite

### Combined advantages

- Saturated grey colour
- Excellent decorative qualities
- Most economical and budget-friendly offering on the market
- Anti-skid coating
- Improved moisture resistance
- Stable colour
- Resistance to alkaline detergents
- 100% high-quality birch plywood
- Individual approach
- Cutting and CNC based on customized specifications and drawings
- Our products are FSC® certified

### Not only for transport

The use of Segezha Anthracite is not limited only to transportation. Its physical and aesthetic properties have made this plywood irreplaceable in the construction of children's playgrounds and sporting and concert venues and in the outfitting of storage facilities. Everywhere where decorative qualities, reliability, skid-resistance and simplicity of maintenance are of importance.

**manufacturing**  
two industrial sites

**team**  
professional excellence and commitment of the team

**quality**  
state-of-the-art equipment, systems of ultrasound and optical scanning

we planted **12000** km<sup>2</sup> of forest within just **5** years

**certification**  
over 95% of our forest land has been certified according to the FSC® standard

**service**  
customized approach to each order; we offer cutting and CNC processing services based on the customer's specifications; worldwide delivery

**resources**  
we have our own sources of raw materials

### Grey is the new brown

The brown coating used traditionally in commercial transport now has a replacement in Segezha Anthracite, a line of high-quality birch plywood coated with a film in a refined grey hue.
